### **NEW DEVELOPMENTS WITHIN PULSE PROJECT**

The project 'Pulse: Language and Communication Skills for Foreign Nurses' has the aim to improve language and communication competences of nurses working in a foreign country, or planning to work abroad. Currently the partners are finalizing the development of the E-learning methodology and curriculum for workplace language and communication for nurses and have already started working on the PULSE E-learning course.

*Partner Meeting in October 2017, Siena, Italy*

During the meeting the representatives of UNISTRASI presented the descriptors and syllabus concerning the Italian course to take as example for the other two languages. The partners discussed the learning units, communication tasks, vocabulary and grammar of the E-learning course. PULSE course will be an interactive tool with educational, engaging and entertaining character, which will enable foreign nurses to quickly achieve progress in adaptation and language learning. It will contain specific assorted text materials, basic grammar rules and communicative structures, ice-breaking exercises, games and tests, combined with videos of real-life situations and experiences of migrant nurses. The PULSE course will be produced in three targeted languages: French, Italian and Dutch. Each language version will be supported in Spanish, Bulgarian and Romanian.

### **WHAT'S NEXT ON PULSE...**

Next year in June, when the E-learning course is ready, it will be tested during workshops with representatives of the target groups in the languages French, Italian and Dutch.
